

Overview of presentation

Keeping and Maintaining Your Health Insurance gives an overview of the options you have available to you if you lose your health insurance. The presentation will also describe federal and state programs as well as other sources of assistance that can aid you if you need to continue taking treatment for an illness or require a medical procedure. This presentation will address the following questions:

- What are my protections under my employer's health plan?
- What happens if I lose my job?
- What happens if my child loses dependent status under my employer's group health insurance?
- What are some federal programs that can help?
- What's happening with Medicaid/Medicare and healthcare reform and how can it help me?

In exploring answers to these questions, the presentation seeks to identify potential sources of insurance assistance for patients and caregivers. Questions specific to your state or region will also be addressed.

Introducing your speaker: Lynne Szott

Since receiving her registered nurse degree from Indian River State College, Lynne Szott has dedicated herself to advocating for people with catastrophic illnesses.

Currently, Ms. Szott manages reimbursement issues for specialty injectable drugs at CSL Behring. These drugs include CSL Behring's set of injectable therapies for coagulation disorders and primary immune deficiency disease. Her work at CSL Behring is a continuation of 15 years of volunteer service at the Immune Deficiency Foundation, a nonprofit organization devoted to improving the diagnosis and treatment of patients with primary immune deficiency disease.

Prior to joining CSL Behring, Ms. Szott worked for 5 years as a case manager for children with special healthcare needs at the Florida Department of Health. Her cases involved children with catastrophic illnesses who were insured through Florida's State Children's Health Insurance Plan (S-CHIP) and Medicaid programs. The Florida Institute for Family Involvement recognized her in 2004 by inducting her into its Critical Partners Hall of Fame as an Outstanding Community Provider.

CSL Behring: The sponsor of Common Factors

CSL Behring is committed to changing the lives of people with serious and rare bleeding disorders. Our heritage of innovation, combined with our dedication to patient support through unique patient programs, makes us leaders in the research and development of advanced treatments for hemophilia A and other bleeding disorders.
